

I believe the ARRL's petition RM-10867 best suits the needs of amateur radio today and for the future. The other petitions still have too many restrictions and would be more complicated to administer. Others in my area I have talked to feel the same. As a licensed amateur since 1991 I feel this plan will bring educated and informed new amateurs to the service. Hope this Restructure is put in place as soon as possible. Charles E Dodson KC4ZEX
